Phase No	Price components by phases	Prices of the phases, %	Price (EUR)
1	Main gas pipeline MINSK-VILNIUS-VIEVIS DN 1000		
1.1.	Assembling of the gas pipeline cleaning and diagnostic equipment including spare materials and pigs (EGP, MFL) as well as its delivery to the site of the Contracting Authority	30%	57 000.00
1.2.	Preparatory works: checking the completeness and fitness of the gas pipeline cleaning and diagnostic equipment, pushing a test pig with a calibrating device through the gas pipeline, and issuing a report on the preparedness of the gas pipeline for diagnostic inspections	5%	9 500.00
1.3.	Gas pipeline cleaning by pushing the cleaning pig through the pipeline 5 times and assessing the pipeline's preparedness for inner diagnostics	10%	19 000.00
1.4.	Gas pipeline diagnostics (overall) including:		
1.4.1.	Checking the gas pipeline geometry with an EGP. Collecting data on the gas pipeline geometry (ovality, dents, corrugated elements etc.)	10%	19 000.00
1.4.2.	Checking the gas pipeline for metal corrosion, anomalies and other defects with an MFL pig. Collecting data on such pipeline defects.	30%	57 000.00
1.5.	Preparing a preliminary report enabling the assessment of the data on the gas pipeline's technical condition collected by means of EGP, MFL pigs, in particular the data on the most dangerous pipeline defects – within 30 days after pushing the diagnostic equipment through the pipeline.	5%	9 500.00
1.6.	Preparing the final report on the gas pipeline diagnostic services in both paper and electronic format (including a detailed analysis of the main defects, determining the spatial position of the pipeline, pipeline strength calculations, determining the pipeline's service life, and providing recommendations on correcting the defects) – within 30 days after the submission of the preliminary report.	10%	19 000.00
1.1.-1.6.	Total contractual price of the procurement object excl. VAT:	100.0%	190 000.00
1.7.	Prices/rates (total) for additional cleaning and diagnostic services which the Contracting Authority is not obligated to buy but which the Service Provider must render at the Contracting Authority's request if necessary

	including:		
1.7.1.	Additional cleaning of the gas pipeline with a cleaning pig by pushing the pig once (when the cleaning is performed more than 5 times)		3 800.00
1.7.2.	Additional checking of the gas pipeline geometry by pushing the EGP once.		5 400.00
1.7.3.	Additional checking the gas pipeline for corrosion, anomalies and other defects by pushing an MFL pig once.		16 800.00
1.1. -1.7.	Total price for tender comparison (excluding VAT):		216 000.00

2	MGP to KALININGRAD DN 700 (with a looping to Jonava DN800)		
2.1.	Assembling of the gas pipeline cleaning and diagnostic equipment including spare materials and pigs (EGP, MFL) as well as its delivery to the site of the Contracting Authority	30%	51 000.00
2.2.	Preparatory works: checking the completeness and fitness of the gas pipeline cleaning and diagnostic equipment, pushing a test pig with a calibrating device through the gas pipeline, and issuing a report on the preparedness of the gas pipeline for diagnostic inspections	5%	8 500.00
2.3.	Gas pipeline cleaning by pushing the cleaning pig through the pipeline 5 times and assessing the pipeline's preparedness for inner diagnostics	11%	18 700.00
2.4.	Gas pipeline diagnostics (overall) including:		
2.4.1.	Checking the gas pipeline geometry with an EGP pig. Collecting data on the gas pipeline geometry (ovality, dents, corrugated elements etc.)	10%	17 000.00
2.4.2.	Checking the gas pipeline for metal corrosion, anomalies and other defects with an MFL pig. Collecting data on such pipeline defects.	29%	49 300.00
2.5.	Preparing a preliminary report enabling the assessment of the data on the gas pipeline's technical condition collected by means of EGP, MFL pigs, in particular the data on the most dangerous pipeline defects – within 30 days after pushing the diagnostic equipment through the pipeline.	5%	8 500.00
2.6.	Preparing the final report on the gas pipeline diagnostic services in both paper and electronic format (including a detailed analysis of the main defects, determining the spatial position of the pipeline, pipeline strength calculations, determining the pipeline's service life, and	10%	17 000.00
