Declaration of Conformity

(according to ISO-IEC 17050-1)

Name of producer: ABB Sp.z o.o.

Address: Leszno 59, 06-300 Przasnysz

Object of Declaration: HV fuse links, types CEF, CEF-S, CEF-VT

Basing on our best knowledge we declare that 2015 production series of **CEF, CEF-S and CEF-VT** come with many beneficial features like combined operating voltages, welded current path, standard outdoor sealing and improved striker pin force (80N). Design modifications of fuse-links type **CEF, CEF-S, CEF-VT**, do not modify product performance, so according to PN-EN 60282-1:2010 regulations, type tests are not required. The upgraded design simply extends application flexibility and reliability of CEF series fuses and is fully comparable as regards type test validity and with previously produced CEF types (including CEF, CEF-U, CEF-S, CEF-VT, CMF and their TCU/BS/outdoor variants).
