

SRG Accessories

SRG Fist Microphone

The fist microphone connects to the rear of the console or AIU using a 10-way Hirose connector. It is a half-duplex accessory and must be used with a loudspeaker.

A button located on the top of the microphone can be programmed for various functions i.e. clear down, last number redial etc.

Lead length	630mm
Environmental protection	IP31

Fist microphone	300-00062
