

SC21 Series Accessories

SC21 Antennas

Antennas are colour coded to indicate frequency band.

Nominal gain figures shown in the table are measured in free space at resonance. These figures will degrade when used close to the body.

General characteristics

- Nominal impedance: 50Ω
- VSWR at resonance ≤1.5:1
- Connector type: M6
- Operational temperature range: -20°C to +55°C (useable range -30°C to +75°C)

All antennas are supplied in packs of 10 of the same type.

		Type/nominal gain	Quarter wave />0dBi	Extended helical >-1dBi	Compressed helical >-1dBi
Frequency	Colour code	Centre frequency	Part no.	Part no.	Part no.
380-430MHz	Green	405MHz		300-01931	
385-430MHz	Green	405MHz			300-01932
806-870MHz	Orange	834MHz	300-01924
