SRG Remote Console Cable

The remote console cable is used to connect the Console, AIU or HBC to either of the 'HD 15 way D-Type' interface connectors at the rear of the transceiver. The cable carries: –

- Console comms
- PEI comms
- Console power
- Audio in and out

Different length cables provide a flexible installation solution so that the console can either be installed locally or remotely from the transceiver.

Please note: The cable is not included with the transceiver or console (unless otherwise stated). This item should be ordered separately.

| Description | Part number |
|----------------------------|-------------|
| Remote console cable, 0.5m | 300-00067 |
| Remote console cable, 2m | 300-00068 |
| Remote console cable, 3m | 300-00664 |
