Latex Declaration

Dear Customer,

Smith & Nephew Medical Ltd hereby certify that our wound management products are not made with natural rubber latex.

The U.S. Food and Drug Administration (FDA) has guidance stating that it is not aware of any tests that can independently demonstrate a product as latex free. (See FDA 2014 Guidance, Recommendations for Labelling Medical Products to Inform Users that the Product or Product Container is not made with Natural Rubber Latex available at <https://www.fda.gov/media/85473/download>.)

Therefore, Smith+Nephew Medical Ltd employs rigorous systems and procedures to ensure our products are not made with natural rubber latex as part of their raw materials and packaging.

In addition, Smith+Nephew Medical Ltd, as a responsible manufacturer, makes a particular effort to ensure during our manufacturing process, the elements of our manufacturing equipment which come into contact with our products during their manufacture are not made with natural rubber latex.

Therefore, we can confirm our products are not made with natural rubber latex unless otherwise specifically stated on the product packaging.
