

Declaration regarding phthalates for stationary sampler WS 312-24

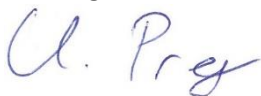

28 May 2024

This document is to confirm that the offered sampler WS 312-24 fulfills the requirements for taking samples for phthalate analysis.

The following necessary adaptations have been made:

- adaptation of the material of the intake line
- adaptation of the material of the metering head
- adaption of the material of relevant sealings
- miscellaneous minor adaptations

Best regards,

Ulrich Preg
Managing Director
